

Manufacturing Best Practices for Plant and Equipment Reliability

Maintain, Repair, Rebuild and Protect Industrial Equipment.

Identify key accounts that would benefit from a LOCTITE Workshop:

- 10+ maintenance personnel
- Progressive accounts that are interested in advanced maintenance practices.
- Time allocated to train

On-site consulting identifies asset

protection, reliability and preliminary cost savings with LOCTITE Solutions

LOCTITE conducts a Plant Survey with maintenance facility or plant management team to identify immediate challenges and needs

- Maintenance Managers
- Training Department
- H&S Department

Conduct On-site MRO Workshop with maintenance staff.

Performed by the local LOCTITE specialist, the hands-on workshop focuses on LOCTITE tools and technologies to address the core maintenance challenges

Follow up in-plant consulting with cost savings documentation, consistently evaluate ROI and identify and implement new LOCTITE Solutions

Cost Saving Solutions to Make the Biggest Impact for the Least Expense

Increase Reliability

Increase Efficiency

Customer Benefits

Reduced Costs

Improved Safety

Key Contacts to Identify:

Maintenance Managers / Engineers
Reliability Managers / Engineers
Safety Managers

Key Questions to Ask:

- How do you quantify unscheduled downtime?
- Do you utilize a CMMS (computerized maintenance management system)?
- How much money does 15 minutes of unscheduled downtime cost your plant?
- Does your plant have a Maintenance Reliability Team?
- Can you introduce me to them?
- When do they meet?
- What is your top cause for unscheduled downtime?
